

DSL FABRICATION FACILITIES

Our Facilities are located in Great Yarmouth in the UK, where we carry out a range of fabrication projects ranging from general fabrication Oil and Gas related along with non-oil and gas related scopes such as Deck Extensions, Sub Sea Templates and Pipework, Sea Fastening, Container Repairs to specialist fabrication such as Drilling Derrick, Masts & Substructures and Rig Modification Kits.

Unlike many fabricators, at DSL you have the option of providing the drawings of your requirements or you can utilise our extensive Engineering resource to have us design or assist with your requirements.

Our facilities can provide you with support within the UK and around the World, and of course we can supply site/offshore personnel from all our locations to support the installation of any fabricated items that you may require.

The Quality Management System that we operate and are accredited to, provides you with the assurance that QA/QC of our fabricated components is of the highest standard, supported with comprehensive manufacturing data books including all of the relevant certification and documentation applicable to your product.
